3691112g 1 04.27.20

#### Maestro PRO LED+ Dimmer

Phase-selectable dimmer for LED, ELV, MLV and incandescent lamp loads.

#### **Features**

- Large tapswitch with a rocker-style dimmer for a standard designer wallplate opening.
- Advanced dimming technology designed for compatibility with a broader range of high-efficacy bulbs.
- UL<sub>®</sub> Listed to control:
  - Dimmable LED with integrated driver
  - Electronic Low-Voltage (ELV)
  - Magnetic Low-Voltage (MLV)
  - Dimmable compact fluorescent lamps (CFLs) with integrated ballast
  - Incandescent and halogen
  - Philips Advance Mark 10® ballasts
  - Hi-lume 1% 2-Wire (LTE) LED driver
- Low-end adjustment to accommodate a wide range of bulbs.
- Can be used in single-pole or in multi-location (using MA-R) applications.
- Coordinating Claro and stainless steel wallplates available separately.
- 100% factory-tested.

#### **Product Specific Features**

- NEMA SSL-7A-2015 compliant (in forward-phase mode)
- Neutral optional See Load Type and Capacity table on page 5
- RTISS Equipped circuitry compensates in real time for incoming line-voltage variations (neutral connection required)
- Capable of controlling up to 250 W dimmable LED or 500 W incandescent/halogen or mixed bulb type per Multigang and Mixed Bulb Type Ratings table (see page 5)
- Capable of controlling up to 500 W of ELV or 400 VA of MLV or up to 20 Hi-lume 1% 2-Wire (LTE) LED drivers
- UL<sub>®</sub> Listed for field interchangeable plastics

Wallplate sold separately

#### **Model Number**

MA-PRO-XX<sup>1</sup> Single-pole/3-way<sup>2</sup>/Multi-location

#### Color Change Kit Model Numbers

MK-D-XX<sup>1,3</sup>
1 Piece Color Change Kit
MK-D-5-XX<sup>1,3</sup>
5 Piece Color Change Kit

- <sup>1</sup> "XX" in the model number represents color/finish code. See **Colors and Finishes** on page 4.
- <sup>2</sup> For 3-way and 4-way dimming, Maestro companion dimmers must be used
- <sup>3</sup> Color change kits do not include wallplates.

# **Specifications**

#### Regulatory Approvals

- UL<sub>®</sub> Listed to U.S. and Canadian safety requirements (UL 1472/CSA C22.2 184.1)
- NOM
- NEMA SSL-7A-2015 forward phase compliant

#### **Power and Ratings**

- 120 V∼ 50/60 Hz
- Maximum Load
  - 250 W Dimmable LED

or

- 500 W incandescent/halogen/ELV

or

- 400 VA MLV

or

- 20 Lutron Hi-lume 1% 2-Wire (LTE) LED driversor
- Mixed bulb type per Multigang and Mixed Bulb
   Type Ratings table (see page 5)
- Minimum Load
  - See approved lamp list for LED at www.lutron.com/LEDfinder

#### **Environment**

- For indoor use only
- Operating temperatures 32 °F (0 °C) to 104 °F (40 °C)
- Relative humidity: 0% to 90% non-condensing

#### Performance

- Power failure memory: Should power be interrupted, the control will return to its previous state when power is restored.
- Tested to withstand surge voltages without damage or loss of operation, in accordance with IEEE C62.41-1991 Recommended Practice on Surge Voltages in Low-Voltage AC Power Circuits.
- Tested to withstand electrostatic discharge without damage or memory loss.
- For 3-way and 4-way dimming, use Maestro companion dimmers. One dimmer can be used with up to 9 multi-location companion dimmers.
- Total multi-location wire length (blue wire) between all units must not exceed 150 ft (45 m).
- Includes a Front Accessible Service Switch (FASS) for safe bulb replacement.

# **Application Requirements**

- When using LEDs or CFLs, only bulbs marked or rated as DIMMABLE can be used.
- For a complete list of approved DIMMABLE LEDs please visit www.lutron.com/LEDfinder

#### Mounting

• Requires a U.S. wallbox. 3.5 in (89 mm) deep recommended, 2.25 in (57 mm) deep minimum.

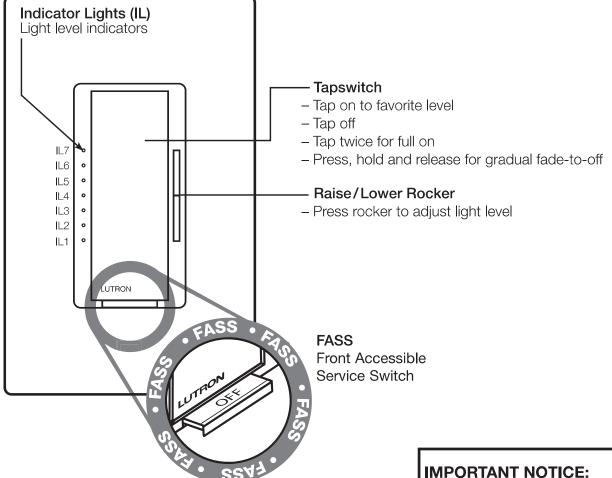

#### Warranty

1 Year Limited Warranty
 For additional Warranty information, please visit www.lutron.com/TechnicalDocumentLibrary/369-119\_Wallbox\_Warranty.pdf

# Operation

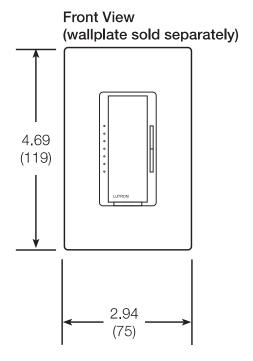

FASS - Front Accessible Service Switch

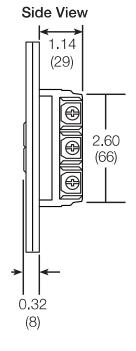

To replace lamp(s), remove power by pulling the FASS out fully on all main controlling devices. After replacing lamp(s), push the FASS back in fully to restore power to the control(s).

- Designed for use with permanently installed LED, incandescent, tungsten halogen, or magnetic low-voltage transformers with halogen based lamps.
- <sup>2</sup> See bulb list at www.lutron.com/ledfinder
- SSL-7A-2015 compliant when in forward-phase,
- When using magnetic (core and coil) low-voltage transformers with halogen lamps set the dimmer to forward-phase. When using with dimmable electronic (solid-state) low-voltage transformers set the dimmer to reverse-phase.
- Operation of a low-voltage circuit with lamps inoperative or removed may result in transformer overheating and premature failure. Lutron strongly recommends the following:
  - Do not operate low-voltage circuits without operative lamps in place.
  - Replace burned-out lamps as soon as possible.
  - Use transformers that incorporate thermal protection or fused transformer primary windings to prevent transformer failure due to overcurrent.
- When using the dimmer/switch to control MLV halogen fixtures, the maximum lamp wattage is determined by the efficiency of the transformer, with 70%-85% as typical. For actual transformer efficiency, contact either the fixture or transformer manufacturer. The total VA rating of the transformer(s) shall not exceed the VA rating of the dimmer/switch.
- Includes Philips Advance Mark 10<sub>0</sub> ballasts, Sylvania<sub>0</sub>, Tu-Wire, and POWERSENSE<sub>0</sub>.
- Neutral is recommended for best dimming performance, if available, but is not required for this load type.

# **Advanced Programming Mode**

Maestro dimmers and switches contain an Advanced Programming Mode (APM) that allows users to customize the control to meet their specific needs. For a detailed description of APM features and uses please refer to Lutron Application Note #703 (P/N 048703) at www.lutron.com

Available Advanced Features				
Feature	Description			
High-end trim	Select the maximum available light limit.			
Low-end trim	Select the minimum available light limit.			
Enable/Disable/Dim Indicator Lights	Select the brightness of the LEDs when the dimmer is Off.			
Delayed long fade-to-off	Set the length of time to wait before entering a long fade-to-off.			
Fade off time	Control the rate at which the dimmer fades from full intensity to Off when the tapswitch is pressed.			
Fade on time	Control the rate at which the dimmer fades from Off to preset intensity when the tapswitch is pressed.			
Protected preset	Set the intensity that the dimmer will always turn on to when the tapswitch is pressed once.			
Phase selectable	Select between forward-phase, reverse-phase, and phase auto-select. The default with no neutral connection is <b>phase</b> auto-select. The default with neutral connected is <b>reverse-phase</b> .			
Restore default	Select to return dimmer to its original factory settings			

#### Instructions for selecting phase:

- 1. Open the FASS.
- 2. Press and hold \_\_\_. Close the FASS and continue to hold for 5 seconds.

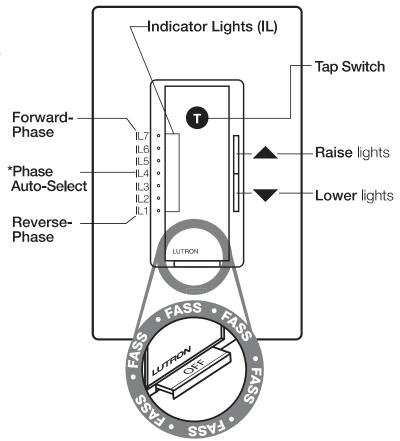

**Note:** The current phase selection will illuminate:

IL7 (top, forward-phase)

IL4 (middle, phase auto-select-default with no neutral)\*

IL1 (bottom, reverse-phase-default with neutral)

- 3. Press the 
  or 
  to get the desired selection.
- 4. Press T to exit Phase Selection mode.

<sup>\*</sup>Phase auto-select defaults to reverse-phase unless the LED load cannot operate correctly. It will then switch to forward-phase automatically. Phase auto-select is only available when no neutral wire is connected.
